## Electrical Safety Tools and PPE

At LU SAFE, we understand that safeguarding your workforce is paramount. Our collection of Personal Protective Equipment (PPE) ensures that your employees are shielded against potential hazards in the humidity and dust exposed, arch flash and gas explosion risky environment. From flame-resistant and antistatic clothing to eye protection and respiratory gear, we offer a diverse range of PPE that adheres to international safety standards. Our products not only prioritize safety but also provide comfort, allowing your team to carry out their tasks with confidence.

Our PPE includes:

- ATEX clothing, including flame-retardant coveralls
- Safety eyewear and goggles
- Respiratory masks and breathing apparatus
- Ear protection gear
- Arch flash protection full suit
- Hand and foot protection solutions etc.

Electrical safety is a critical concern in petroleum industry operations. Our cutting-edge Electrical Safety Tools are engineered to mitigate the risks associated with electrical work. With a focus on preventing electrical accidents and maintaining equipment integrity. Whether it's voltage detectors, insulated gloves, or grounding equipment, our range of tools is a testament to our commitment to your workforce's safety.

Our Electrical Safety Tools include:

- Voltage detectors and testers
- Insulated gloves and mats
- Grounding and bonding equipment
- Arc flash protection gear

## **Substation Cleaning and Maintenance Services**

We provide Specialized Cleaning and Sealing Services, including cleaning of energized equipment surfaces as transformers, isolators, reactive power compensators and UPS panels from dust, as well as sealing of gaps to achieve a full integrity.

Maintenance services include inspections and testing to achieve full integrity and reliability. We ensure proper functioning of equipment and compliance with regulations.

Regular Cleaning Services includes: the cleaning of panels and other areas prone to dust, stain, and dirt.

Our technicians understand the critical nature of energized panels and will follow all necessary safety protocols and procedures. We assign a professional and competent team comprising skilled electrical spec
